

The Honorable Congresswoman Tammy Baldwin
2446 Rayburn Building
Washington DC 20515
United States House of Representatives
Washington, DC 20515

March 6, 2009

Dear Congresswoman Baldwin:

On behalf of Alflight, Inc., I am writing for your support of adding \$4.1M line item in the House Appropriations Subcommittee on Defense in the DoD budget under Army RDT&E PE#62120A & Line Item#6 in Sensors and Electronic Survivability for development of compact, low cost and light weight “eye-safe” laser range finder to provide our troops additional advantage in the battlefield. These funds are for the development of critical laser crystal and delivery of prototype “eye-safe” range finder to the Army using Alflight’s unique laser architecture. The impact is to have more safety and better effectiveness for our armed forces.

We also anticipate use of these devices for tracking wind speed and direction that is indispensable for maximizing energy extraction in wind turbines.

Alflight has a track record of delivering differentiated solutions to DoD and these past effort has resulted in dual-use technologies that has helped the public sector as well.

Alflight is a leading semiconductor photonics company in the mid-west, and has created 55 high paying and high impact jobs in the Madison area. We draw talent from the engineering graduates out of University of Wisconsin-Madison and technical hires from the Madison Area Technical College. This program will create additional jobs in the Madison community, and has the potential to reach higher volume production which will have positive economic impact in the Madison community. With continued success, Alflight is poised to add to the “high tech”, “new technology”, “super for doing business” and “super for a balanced lifestyle” image of the Madison area.

I hope that you will support by helping to obtain the line item Alflight is requesting for inclusion in the Fiscal Year 2010 House Appropriations Subcommittee on Defense Bill.

Sincerely your,

Mohan Warrior
CEO & President
