Washington D.C. 20515-4902

Subject: West Bank Sewer and Water Improvements

Dear Ms. Baldwin:

Thank you for the opportunity to submit an application for a Fiscal Year 2010 appropriation for the extension of water main and sanitary sewer main between Afton Road and the Rock River in the Town of Beloit. The homes in this area currently rely on private wells and septic systems for water supply and to treat their effluent. They are located near the river with a shallow depth to bedrock, causing concerns that the effluent is leach through the bedrock into the aquifer supplying drinking water to the Beloit area. Many of the residents in this area have low to moderate incomes.

Extension of public water supply and sewer supply to this area will reduce public health risks and improve fire protection.

Sincerely,

Greg Groves  
Chairman
